EXPERIENCE

Kinetic Vision — Interactive Applications Developer Intern

January 2026 – April 2026

- Developed immersive VR applications in Unity Engine, recreating physical environments and interactive systems.
- Built custom object manipulation, 3D annotation, and spatial measurement tools within VR.
- Collaborated directly with clients to gather requirements, communicate progress and ensure project quality.
- Architected and implemented feature sets for internal and production web applications.
- Participated in Agile development workflows using git-based source control and Jira issue tracking.

IT Solutions Center — Full Stack Developer

April 2024 – August 2025

- Delivered full-stack features for production sites used by 1,000+ users across multiple client organizations.
- Built and maintained frontend interfaces, backend services, APIs, and database integrations.
- Improved usability, accessibility, and performance, through feature enhancements and debugging.
- Delivered projects for clients including Macy's, Brooksource, University of Cincinnati, and Ohio Supreme Court.
- Used GitHub for version control and peer code review, resolving 50+ pull requests.

HealthEdge — Infrastructure Operations Intern

May 2023 – August 2023

- Resolved service tickets via navigating Linux directories, upgrading company software, and updating customer databases.
- Gained hands-on knowledge of healthcare IT architecture within the industry.
- Wrote and executed shell scripts to automate manual workflows, turning day-long projects into 30-minute tasks.

EDUCATION

University of Cincinnati — Cincinnati, OH

August 2021 – May 2026

- Bachelor of Science, Information Technology; Game Development and Simulation | GPA: 3.55 | Dean's List.
- Completed 5 semesters of full-time internships in software and game development.

PROJECTS

Delta Sync — Website & Mod for Assetto Corsa

github.com/Blenisj/Delta-Sync

- Built a full-stack web app (React.js, Vite / Acsys / Google Firebase) that interfaces with the racing simulator Assetto Corsa.
- Collects, processes, and visualizes racing telemetry data for users, featuring dashboard, telemetry comparison, leaderboards and ranking.

Evaluation Dashboard UI Redesign

- Led UX/UI redesign of a university evaluation platform to improve accessibility and navigation efficiency.
- Redesigned interface workflows and visual hierarchy to streamline user interaction
